

BATTCON 2017  
PRESS RELEASE

**Battcon 21<sup>st</sup> Annual International Stationary Battery Conference and Trade Show  
to Take Place in Orlando, Florida May 7 – 10**

*Content to include NERC compliant battery maintenance session and electric utility workshop*

COLUMBUS, OH [March 27, 2017] – The Battcon 2017 Stationary Battery Conference and Trade Show will hold its 21st annual event May 7 - 10 at the Orlando Renaissance at Seaworld®. This internationally recognized forum for stationary battery users is focused on the design, selection, application and maintenance of stationary battery systems, and provides the opportunity for professional development and networking. The conference has more than 19 sessions for industry novices and seasoned battery professionals.

Battcon is an educational conference where battery users, engineers and manufacturers learn industry trends and best practices for manufacturing, safety, selection, installation, and use of stationary batteries. Educational sessions, delivered by leaders in the stationary battery industry, include presentations, open discussion panels, and breakouts geared to the utility, data center, and telecom segments.

The 20,000 square foot trade show exhibit includes representatives from the industry's leading companies, demonstrating new technologies and solutions.

Preconference seminars, led by industry professionals, provide deep technical information on the topics of Implementing a NERC Compliant Battery Maintenance Program; Stationary Battery Basics; and Beyond the Fundamentals: Advanced Topics in Lead Acid Batteries. A focused session also explores the risk environment and battery hazards, and mitigation steps to ensure a safe environment.

For more information on the Battcon conference schedule and registration, please visit [www.battcon.com](http://www.battcon.com).

**About Battcon**

Battcon is a high-energy mix of industry specific presentations, panels, seminars and workshops, and a trade show featuring product demos, service information and one-on-one access to leading vendors. More than 600 storage battery users meet at Battcon for three days of professional development and networking focused on the design, selection, application and maintenance of stationary battery systems. This is a forum where those in the data center, nuclear, telecom and utility industries can learn from and network with industry experts. Battcon 2017 will take place at the Renaissance Orlando SeaWorld® May 7–10, 2017.
