

## ***A Letter from the Battcon Conference Technical Committee***

Discover Battcon! The Battcon International Stationary Battery Conference, the premier conference for battery end-users, technologists, and manufacturers, offers the unique opportunity for meeting others focused on the same industry concerns as you are. And at Battcon, you'll...

- Experience industry-specific education and networking.
- Get the latest breaking news. Our call for papers runs through February. Presenting a paper is the best way to share your knowledge with your colleagues.
- Sign up for an optional battery seminar to strengthen existing skills or learn of the latest advancements.
- Listen to presentations and discussions by the leading authorities in the field.
- Network with others in the battery community.
- Ask questions, exchange ideas and solutions, and get answers.

Attending Battcon could save your company money! Learning of a new development or product could result in a far more efficient way of performing a task. And the all-inclusive price, which includes the conference, trade show, hotel and meals, is a great "no surprise expenses" bonus.

Of course, the technical program is only part of the Battcon experience. In the evenings, visit the vendors you've been wanting to see at the trade show. See what's new and learn what's being developed for the next generation of products. The information you gather will allow you to find the resources you need when you need them.

The Battcon Conference will broaden your knowledge of the issues and concerns of your industry. Visit [www.battcon.com](http://www.battcon.com), where you'll see who will be presenting papers and what companies will be displaying products.

*J. Allen Byrne*

J. Allen Byrne, Engineering, Training, and Technical Support Mgr.  
Interstate PowerCare, Frederick, MD

*Curtis Ashton*

Curtis Ashton, Senior Staff Power Tech Support Engineer  
Qwest Communications, Littleton, CO
