Battcon™: Connecting You With the People You Want to Reach

Since 1997, Battcon Stationary Battery Conference and Trade Show continues to deliver some of the most valuable insights and actionable information to its attendees. Well-known industry leaders present sought-after educational presentations & workshops, and the two-evening trade show is packed with storage power-related vendors.

Presenting your products and services at the Battcon Trade Show gives you access to a highly targeted audience and greatly increases your visibility in the stationary battery community. Take advantage of this unique opportunity to promote your company to the select Battcon audience by reserving a booth, sponsoring key activities, and even presenting to conference attendees. Space and sponsorships are available to any attendee who is interested in marketing a product or service.

About Battcon 2023

Battcon is a high-energy mix of industry-specific presentations, panels, seminars and workshops, plus, two evenings of one-on-one conversations at the battery-themed trade show.

More than 500 storage battery users meet at Battcon for three days of professional development and networking focused on the design, selection, application and maintenance of stationary battery systems.

Data center, nuclear, telecom or utility industry professionals who are working in mission-critical facilities or are involved in the development of stationary batteries and related equipment will find the Battcon experience is second to none.

Why Is It Different Than Other Battery Shows?

Battcon is an educational venue that continues to attract stationary battery professionals looking for best practices and innovations — giving battery industry leaders, like you, even more opportunity to demonstrate products and offer solutions. Users, engineers and manufacturers stay up-to-date by learning about the latest industry trends and how to apply best practices to the manufacturing, safety, selection, installation and use of stationary batteries. The core conference provides an intense learning experience unequalled by any other industry source. Presentations include cutting-edge topics delivered by leading authorities. Open discussion panels and breakout workshops geared to the utility, data center and telecom segments are also included in the conference.
